

Environmental Policy Statement

Environmental Policy

As a leading recycler of waste derived polymers our activities have a positive or minimal impact on the environment, but we are committed to prevent waste and pollution in every aspect of our activities.

We will:

- **Minimise and Conserve**

We identify opportunities to reduce the resources we consume including energy, water and other natural resources, thereby minimising the amount of waste we produce.

Where practicable, we re-use materials, recycle waste and procure recycled products.

- **Involve and Communicate**

We document and communicate this policy to employees and encourage them to participate.

- **Review**

This policy is reviewed at the annual Management Review.

The impacts of existing environmental actions are reviewed. Changes are made based on the results of the review and based on any other changes within the company.

In all our operations we work towards continual improvements to enable us to reduce our negative environmental impact whilst increasing our beneficial environmental impact.

Judith Clayman, General Manager
